Your Contribution Become Easier

In reference to some problems that auction recipients face from the randomness of these auctions and many problems in collecting, returning and providing the amounts to the auctioneer. In addition to the lack of periodic reports to monitor it...

Mazadat platform comes to offer and conduct auction to facilitate the process for beneficiaries from government and private agencies, as it works electronically to verify bidders' data quickly and easily. In addition, providing all auction performance data from reports, indicators and statistics in a comprehensive, accurate and integrated manner by linking them to other systems.
